Eastern Georgia Enduro hike through the savannah and the Greater Caucasus

Georgia's nature is unique and diverse worldwide. Its geological structure contains greater landscape contrasts than some continents in detail. With the diversity of its landscape between mountains and deserts, between snow and palm trees, Georgia is one of the most fantastic countries on earth.

We don't make trips! We hike through the landscapes!

On 67,000 square kilometers you will find 5000 meter high peaks, glaciers, mountain meadows and at the same time a subtropical coast, full deserts, semi-deserts, fertile valleys, wetlands and of course huge untouched forests.
